

# Kids shoe fitter

## Find their size

Little feet grow fast! Did you know, your kids' feet can grow half a size or more every 2 months?

Find the right size by measuring their feet here.

## How to measure

1. Before starting, make sure your child is barefoot.
2. Place print out on a hard flat surface and have child stand against a wall.
3. While against the wall, place their heel where directed.
4. Read the first line past the longest toe.
5. Repeat for other foot. Select size that fits the largest foot best!

For best fit, add a thumb-width space after the big toe to determine shoe size.
